Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-4,6-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It is unclear wherein the specification teaching of “the shower plate being nearer to the sample stage than the electrode” or “a shower plate which is arranged nearer to the sample”.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4, 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation “a shower plate which is arranged nearer to the sample” is vague because it doesn’t not specify what is that the shower plate is arranged nearer than.

5. Claim 5 recites the limitation "the shower plate". There is insufficient antecedent basis for this limitation in the claim. It is suggested to use “a shower plate”.

Allowable Subject Matter

6. Claims 1-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 1-4, 6-11 are allowable because prior art doesn't suggest or teach neutralizing errant charged particles which enter the processing gas supply holes from the plasma during a period of RF power, by bombardment of the errant charged particles against an inner surface of the processing gas supply holes (or by causing errant charged particles to be impinged upon an inner surface of gas supply holes of shower plate), the errant charged particles being other than the charged particles that have entered the sample.

Claims 5, 12-14 are allowable because prior art doesn't suggest or teach a processing gas is supplied from a position not less than 30 mm and not more than one half of a diameter of the sample in distance from the sample, toward a center of the sample through processing gas supply holes having an inclination angle (θ) to a surface of the sample, smaller than $\tan^{-1}(t/d)$, where t is a thickness of the shower plate, and d is a diameter of a processing gas supply hole.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DuyVu n Deo whose telephone number is 571-272-1462. The examiner can normally be reached on 6:00-3:30; with alternate Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on 571-272-1465. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
